We're also looking for live lice -
little ones and BIG ones!

That's what
they look like.

I've got some top-secret information.
There might be head lice at our school.
Let's be head lice detectives & find them!

Wait a minute.
We need the right gear.

What do
we need?

We don't want
to miss any.

We've got white tissues ...

head lice combs and white hair conditioner ...

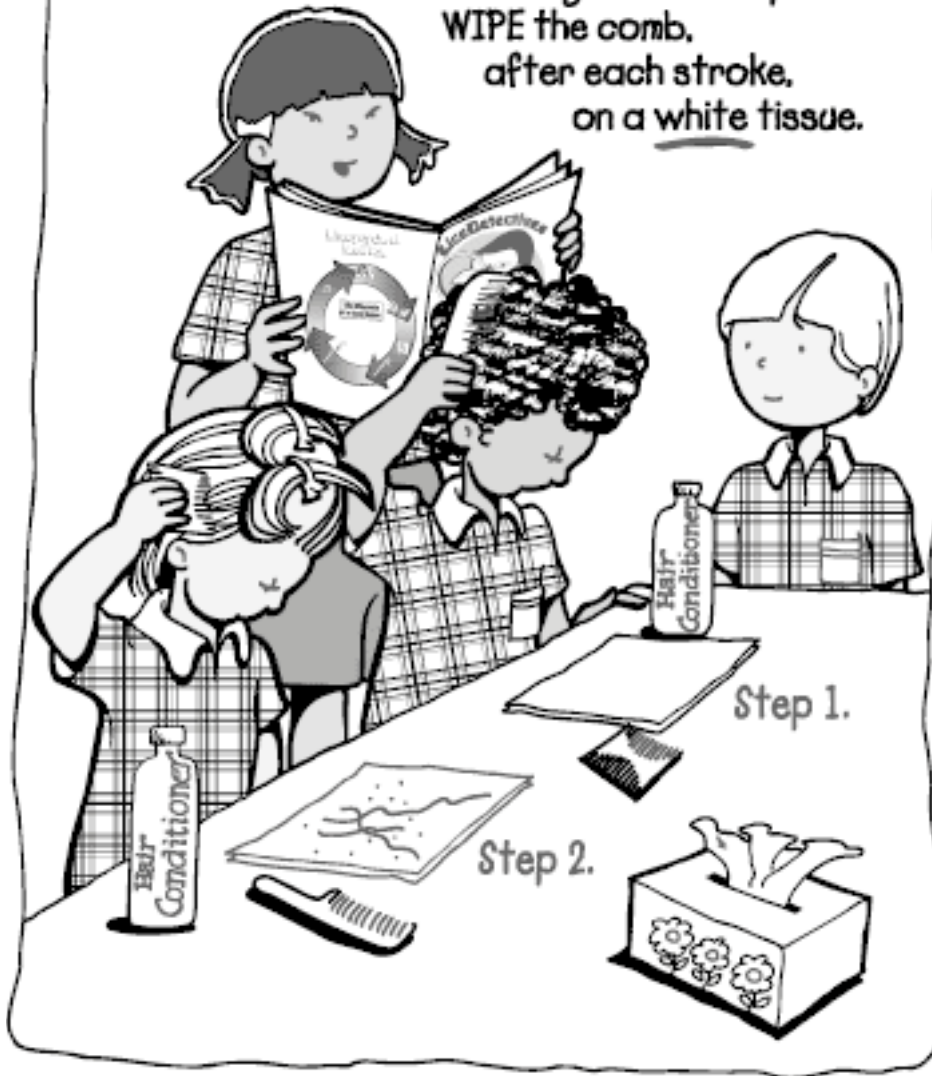

and magnifying glass.

Let's go!

Once a week we need to:

1. APPLY lots of conditioner to DRY hair - spread evenly with an ordinary comb.
2. COMB hair with a special fine-tooth comb, starting at the scalp. WIPE the comb, after each stroke, on a white tissue.

3. **LOOK** carefully for lice on comb and tissue.
4. **PUT** tissues into a bag and seal.
DISPOSE of bag when combing is completed.
5. **RINSE** conditioner out of hair.
6. **SCRUB** combs using an old toothbrush.
